

Guess what happens when public and private sectors share resources and expertise?

PPP Delivers From Every Angle

Recently Awarded:
**Shockey's
11th PPP:
Harrisonburg
Department
of Public
Transportation**

With a public-private partnership (PPP), the public and private sectors work together to complete new schools, jails, and information technology infrastructure projects that serve public interest.

A PPP pioneer in Virginia, Shockey has been a proponent of public-private partnerships since the inception of the Public-Private Education and Infrastructure Act (PPEA) in the Commonwealth in 2002.

Partnerships between the public and private sectors can offer both cost and schedule advantages. When compared to traditional project delivery methods like design-bid-build, a PPP may offer innovative funding arrangements, lower project costs, a quicker project schedule, minimized risks and a more collaborative process.

Experienced private partners like Shockey can bring to the table new ideas and approaches to problem-solving or access to technologies and capabilities that help bring major projects to successful completion.

When each partner shares its assets, strengths, and capabilities – as well as the risks and rewards of the undertaking – all parties win. ✨

‘Energizing’ Shockey’s Experience Benefits Health Center in Roanoke

Howard Shockey & Sons, Inc. and Richmond-based architect Baskervill are design-build partners on a \$10.7 million, two-story building project for New Horizons Healthcare (NHH) in Roanoke.

“Our groundbreaking event was energizing as well as emotional for current and former board members, staff and community partners who have worked so hard through the years to get us to this point,” said Linda Frye, chief operating officer at NHH.

“Once complete, the health care center will quickly become a community anchor and a catalyst for continued business growth and community enrichment,” said Eileen Lepro, NHH’s executive director. ✱ [related story, page 3]

Public-Private FOCUS

Did You Know?

A Shared Savings Clause on this community center project returned **\$1.7 million** to the City of Manassas Park.

Breaking News

Shockey Gets 11th PPP Award

HARRISONBURG, Va. — Shockey will build a maintenance facility and offices for Harrisonburg Department of Public Transportation (HDPT).

Howard Shockey & Sons, Inc. partnered with HDPT, RNL and Maintenance Design Group to build the \$14 million project.

HDPT received seven proposals for consideration. The project was procured under Virginia’s Public-Private Education and Infrastructure Act (PPEA) and when complete, it will be Shockey’s 11th PPP project.

HDPT maintains all public transportation in the City of Harrisonburg, K-12 school buses, and buses that serve the James Madison University campus. ✱

GREENBUILD 2011 CONFERENCE,

Toronto, ON

Canada

REPORT: Greenbuild 2011 Conference

Attended by 30,000 people from around the world, the International Greenbuild Conference is the largest gathering of architects, engineers, developers, contractors and builders involved in the greening of the built environment.

Travis Hall, a LEED® AP project engineer at Shockey, attended the 2011 conference in Toronto and participated in more than 24 hours of instructional seminars on sustainability practices and LEED procedures.

"We attend Greenbuild because we keep current with best practices in both construction technology and process," said Jeff Boehm, vice president. *
